About the Opponents

Pro All-Stars-Team
U.S.A.'s first opponent.
The winner here will
represent the United
States in the World
Cup. The Pro All-Stars are a gung-ho
team with a lot of fancy throwing, but
are a little weak on defense.

India-Team India is
extremely quick and
hard to catch. They
have great defensive
power and can take
a great deal of punishment without
losing energy.

England-Team England
is a high energy team
with excellent technical
ability. They are
consistent in making
clutch throws and will be a definite
threat to the American team.

Iceland-Team Iceland
is a strong team with
big players. They
have a lot of strong
throwers with high
offensive power.
About the Opponents

China - Team China is very quick with consistent throwing ability. They are also defense oriented and are excellent receivers.

Japan - Team Japan is a powerful all-around team. Though this team tends to rely on their best player, they are all excellent players in all aspects of play.

Kenya - Team Kenya is a strong and powerful team. They are powerful throwers as well as good receivers. They are a well balanced team.

USSR - Team USSR is truly awesome. They are an all-around team with exceptional players. This team has no weakness to speak of.

About the "Power" Shots

"Power" Shots are super throws that have a special destructive power. There are all kinds of unique "Power" Shots, and most players have a "Power" Shot or two hidden under their sleeve. The "Power" Shot doesn't happen all the time, it requires a "special timing" for its occurrence.

The Blaster - Sam [Team U.S.A.]
This throw is fast, powerful and destructive. It flies straight toward its intended target.

The Upper Cut - Jack [Pro All-Stars]
This throw flies straight at the target and as it hits the opponent, rises straight up into the air, taking the opponent with it.

The Wave - James [Team England]
This throw moves in a wave-like motion and slams the opponent to the ground.

The Sting - Rajiv [Team India]
This throw buzzes around and follows the opponent until it gives him a sting.
About the "Power" Shots

The Warp- Helgi [Team Iceland]
This throw disappears in mid-air and suddenly reappears in front of the opponent.

The Bunker- Wang [Team China]
This throw appears to fly straight, only to suddenly change direction, and slam into an unsuspecting opponent.

The Boomerang- Yemi [Team Kenya]
This throw flies straight over and past the opponent and then suddenly returns to slam an unsuspecting opponent.

The Compressor- Fuji [Team Japan]
This throw is so fast that the ball becomes compressed into a small sphere only to expand when it hits the opponent.

The Accelerator- Boris [Team USSR]
This throw gets faster and faster as it approaches the opponent.

The Spear- Other Players
This throw is an extremely powerful throw which does not stop even after it hits an opponent.

The Psycho- Other Players
This throw has such a spin on it that the ball appears to split up into many balls.

The Lightning- Other Players
This throw shoots straight up into the air and suddenly strikes the opponent from the sky.

The Sidewinder- Other Players
This throw winds through the air making it difficult for the opponent to judge the ball.

**COMPLIANCE WITH FCC REGULATIONS**

This equipment generates and uses radio frequency energy and if not installed and used properly, that is, in strict accordance with the manufacturer’s instructions, may cause interference to radio and television reception. It has been type tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Relocate the HES with respect to the receiver.
- Move the NBS away from the receiver.
- Plug the HES into a different outlet so that computer and receiver are on different circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the Federal Communications Commission helpful in identifying and resolving radio-TV interference problems: This booklet is available from the U.S. Government Printing Office, Washington, DC 20402, Stock No. 006-000-00345-4.
